**Expedition Africa**

*From an elevated platform:*
- Feed giraffes!
- Marvel at rhinoceroses, exotic birds, antelopes, and an island full of emus.
- Take an African kayak adventure!

**Australia Asia**

*From way down under:*
- Aussie kangaroos, wallabies, fruit bats, black swans, emus, cassowaries, kookaburras, parrots, and warly pigs. You can feed the lorikeets!
- From Asia: Gibbons swing about opposite lovely bonsai trees.

**Wild Florida**

*Wild places, unique wildlife.*
- Alligators, otters, red wolves, foxes, bald eagles, turkeys, turtles, hawks, caracaras, and whatever native creatures are visiting the wetlands today.
- Kayak across the wetlands and see what you can find!

**La Selva Rainforest**

*The rainforests of South America.*
- Every animal gives to the forest: jaguars, monkeys, vultures, giant anteaters, iguanas, sloths, tapirs, macaws, toucans, and tortoises each play a role.

**Paws On**

- Cool off and meet Indian River Lagoon sea creatures in the play lagoon aquarium. Pet a mammal. Build an animal home. Indoors, dig for clues to solve a mystery, care for toy critters, and visit live animals. Open 10 a.m. to 4 p.m.

**Seeing the Giraffes**

Since the giraffes come and go as they please, we suggest you plan to visit Expedition Africa more than once today.
Wildlife Trails
Because the animals at the zoo reside in naturalistic habitats, they are sometimes not immediately visible. They might be napping in tall grass or behind a tree. The zoo is open year-round and the animals’ activities vary depending on the season. Remember, winter is one of the best seasons to see our animals.

Indoor Exhibits
1. USS Antiquities
Discover the diversity of life from its earliest beginnings. Learn how fish, amphibians, reptiles, birds and mammals have changed over time.

2. Diversity of Birds
The earth needs a variety of plants and animals to remain healthy. Explore biodiversity by discovering dozens of species of birds in our free-flight aviary.

3. Adaptation of Animals
Animals have developed many wonderful adaptations to survive. Discover bats, mole rats, sloths and others.

4. Social Behavior
Visit the lions, meerkats, primates and tigers, and explore how living things interact with each other and their environment.

Save the Rain
Green infrastructure is soaking up rainwater all around the zoo! Look for the nutsops on your map to find these green projects:
- Green roof on the Pachyderm Pavilion
- Porous pavement in the courtyard and in the parking lot
- Rain gardens at Primate Park and in the zoo entrance on Willow Ave.
- Citizens and rain barrels to reuse the rain throughout the zoo
- Stormwater wetland at the waterfowl exhibits

Learn more about the green roof on the Pachyderm Pavilion at http://savethesnaps.us/project-elephant/
The Pittsburgh Zoo & PPG Aquarium is a natural habitat zoo and aquarium committed to conserving wildlife and their habitats. To that end, we conduct research, breeding, education, and conservation programs in cooperation with international organizations and zoos across the country. We provide homes for 20 threatened or endangered species. For more information, visit our website at pittsburghzoo.org.
